

Step Into High Earnings

AI-powered DEX

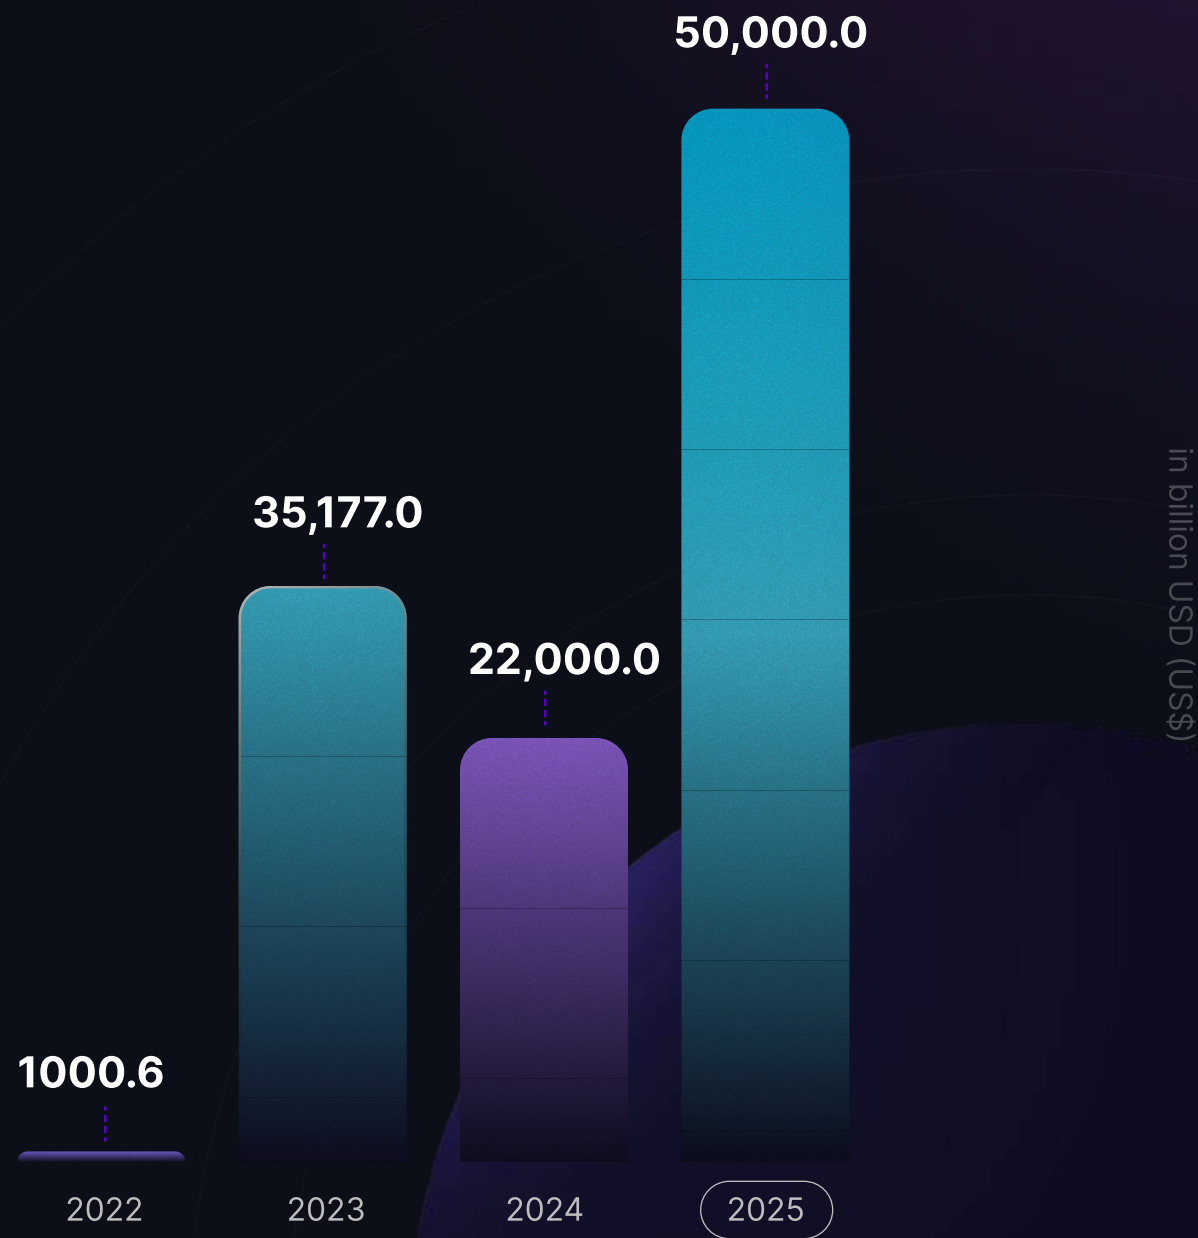

AI-powered DEX for Smart, Lean, and Simple Trading Experience

DeFiPool provides its users with AI solutions for portfolio management and trading operations on DEXs for profit maximization, while keeping the risks under control.

Market overview

1. Revenue in the DeFi market ~ \$50b in 2025
2. Dex volume every 24 hours close to \$19,421b
3. DeFi's TVL has increased by 500% since 2021
4. Number of unique addresses ~ 50M
5. Total TVL in DeFi is \$129,028b

Growth Perspectives

By 2025 revenue reaching ~ \$50 billion.

Market **analysis**

Advantages

**AI-powered, one-click portfolio
management & notifications**

**AI-Powered
Trading Tools**

**Launchpad for prospective
projects**

**Dynamic selection of pools with the
best liquidity and fees**

**AI-Optimized Swap & Bridge
Routing**

All-in-one trading hub

**AI-Based Liquidity Pool
Discovery & Comparison**

**Modular DEX
Extensions**

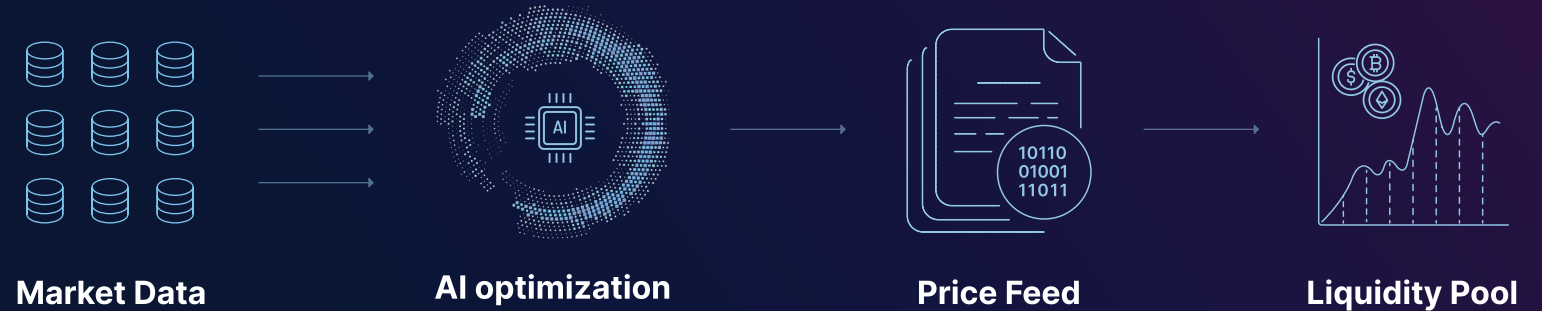

**Aggregated thousands of
Blockchains & Rollups**

KEY FEATURE #1

AI-Optimized Swap & Bridge Routing

How it works

1. AI analyzes user-defined strategies and configures the liquidity pool parameters (fees, ratios, routing paths) to maximize profitability and minimize impermanent loss.
2. The AI models forecast short-term market movements using live Oracle data from multiple DEXs/CEXs and blockchain activity — enabling proactive routing and slippage avoidance.
3. LP commissions are automatically optimized based on trading activity, volatility, and demand across chains — ensuring competitive performance for both traders and liquidity providers.

Cross-chain routing optimized in real time

Zero slippage mode

Maximum available liquidity

Dynamically balanced pools

KEY FEATURE #2

One-click **AI-based** portfolio management

How it works

1. Client specifies the portfolio parameters such as the cryptocurrencies, amount and risk preferences
2. AI analyzes the assets and the corresponding projects and generates a list of suggestions to add to the portfolio
3. User selects individual suggestions or accepts the entire list
4. User receives a well-balanced portfolio with regular re-balancing recommendations generated by the system

KEY FEATURE #3

Professional **AI-powered** trading tools

How it works

1.Users receive personalized trading insights and signals generated from real-time market data, order book dynamics, and on-chain activity.

2.The platform offers pre-configured strategies (e.g., arbitrage, grid trading, mean reversion) that adapt to market conditions and user objectives.

3.Users get alerted about high volatility, depegs, or liquidity drops with AI-driven suggestions to adjust strategy accordingly.

Interactive charts with AI-generated annotations and price movement predictions.

Set your parameters and let AI manage trades 24/7 based on your strategy and risk profile.

The system evolves with the user's trading behavior — the more data it gets, the smarter its recommendations become.

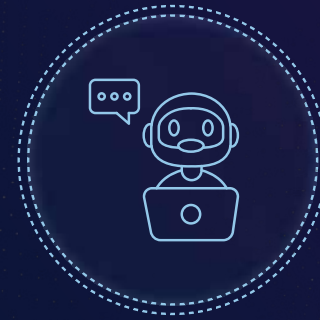

Early warnings on potential losses and market anomalies, with auto-response options like exit triggers.

KEY FEATURE #4

AI-Based Liquidity Pool Discovery & Comparison

How it works

1. Users receive up-to-date insights based on market metrics, liquidity volumes, pool dynamics, and on-chain activity analysis.
2. The platform uses AI to identify available liquidity pools across various DEXs and evaluates key parameters (yield, fees, risk).
3. Users get personalized suggestions for pool selection and alerts on liquidity changes, high risk, or yield drops.

User-friendly interface with filters and pool rankings enhanced by AI-driven analysis.

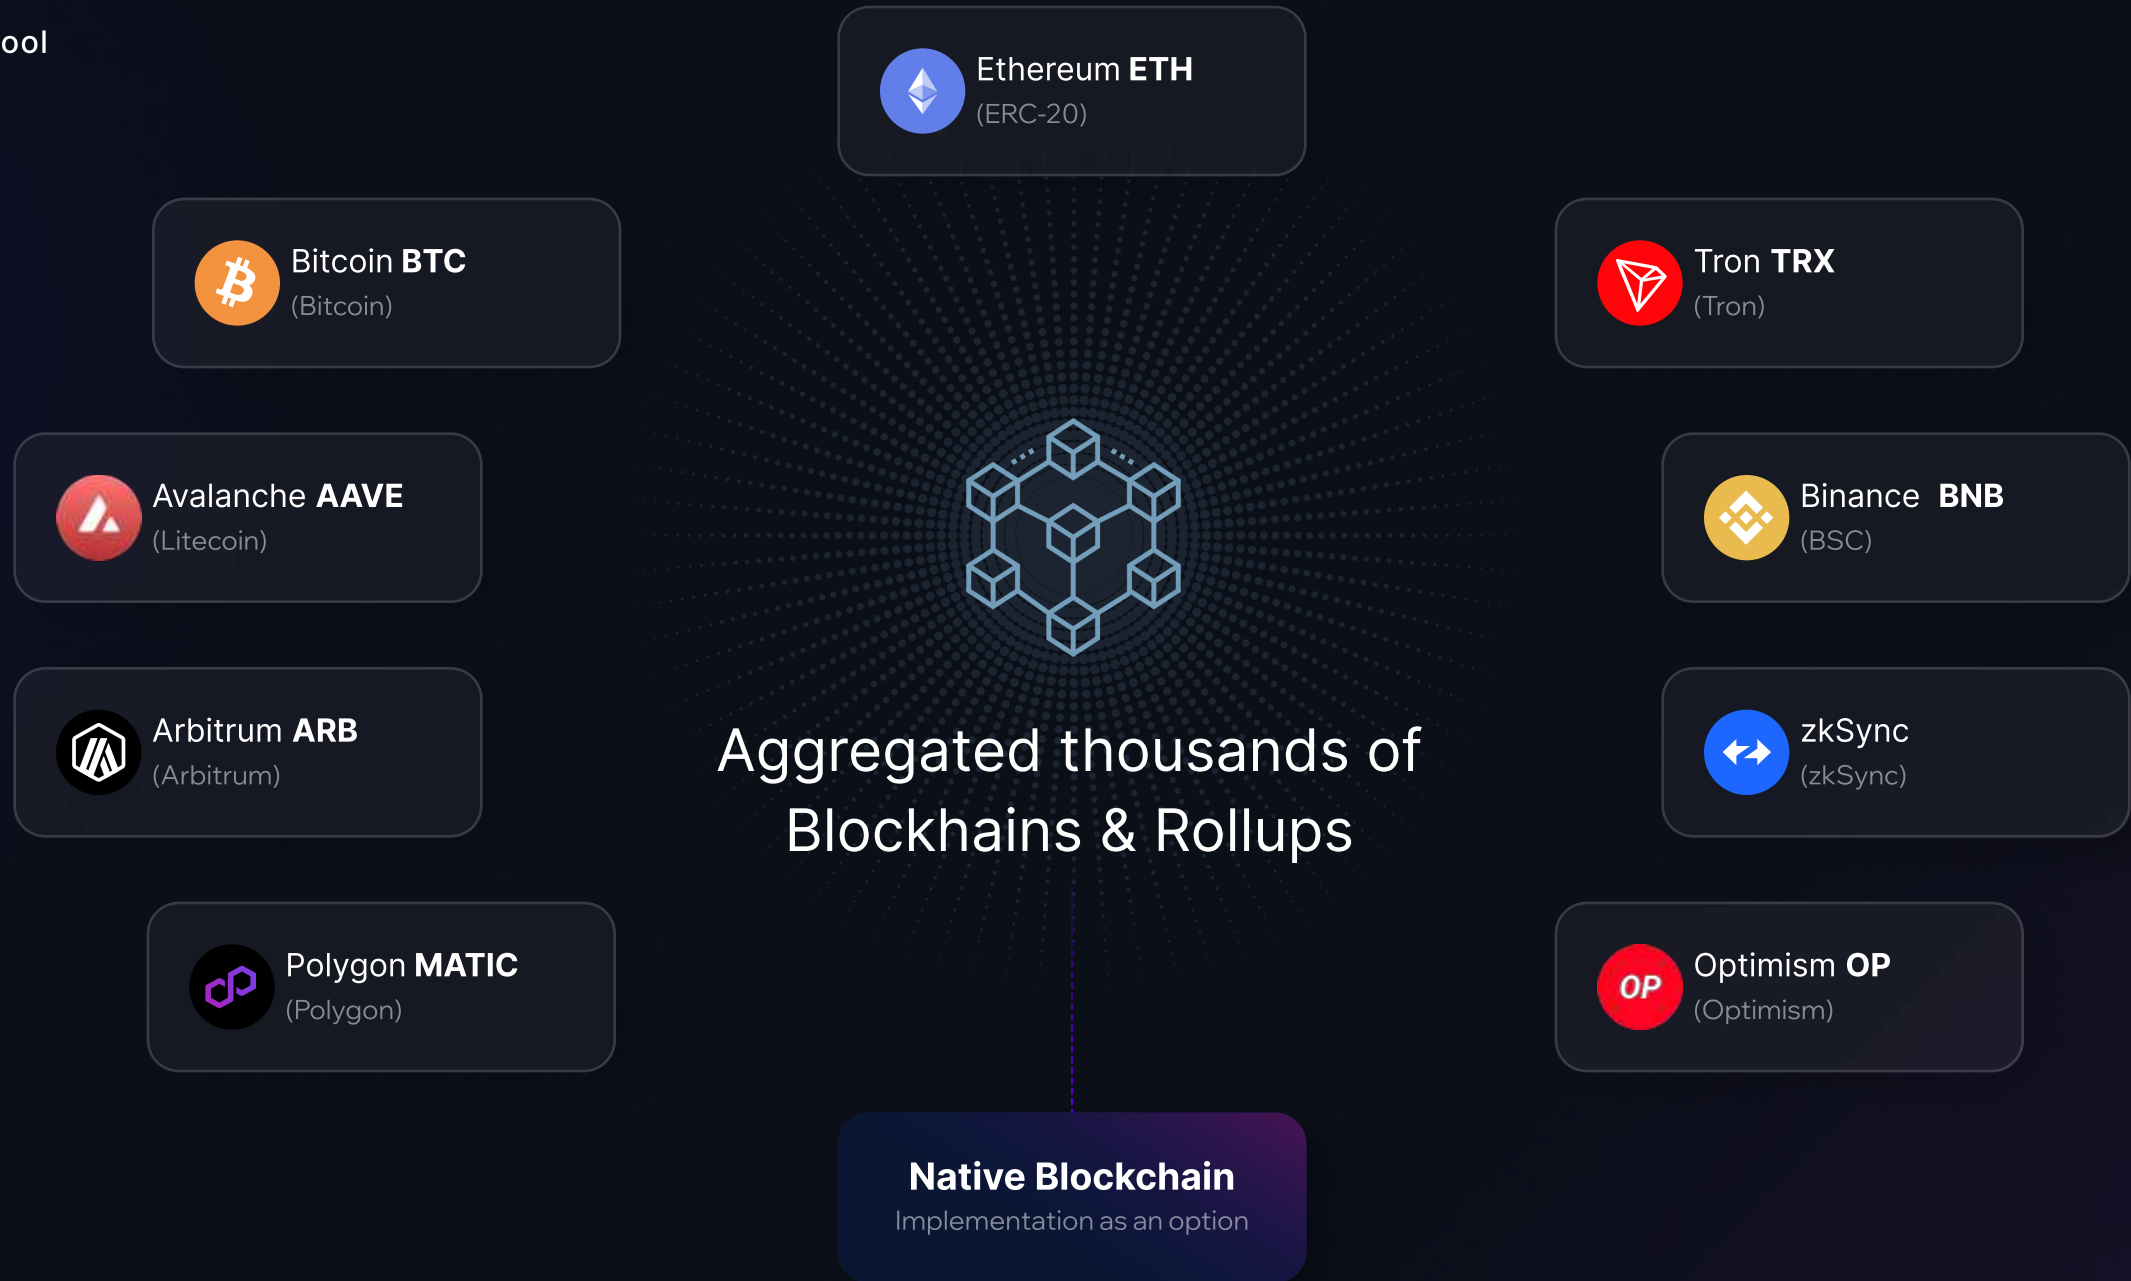

Personalized advice on the most profitable pools tailored to user risk profiles and goals.

AI adjusts to user behavior and changing market conditions to improve recommendation accuracy.

Early warnings on liquidity drops, high volatility, or potential pool issues.

DFP token

The DFP token plays a key role within the DeFi Pool ecosystem and fuels its functionality. At its core is a design that unlocks benefits for both B2B and B2C customers within the platform's products therefore improving the value proposition.

DFP Token Utility

Fee Payments:

Use the token to pay swap and bridge fees on the platform

Farming & Staking:

Token holders can earn rewards through staking or providing liquidity, receiving rewards in tokens or revenue shares.

Governance (DAO Voting):

The token grants voting rights in platform governance: choosing new listings, adjusting fees, launching partnerships, and more.

Launchpad Access:

Exclusive access to token sales, presales, and airdrops of new projects launched via the DEX — for token holders only.

Access to Premium AI Tools:

Only token holders can unlock advanced AI features like optimal routing analytics, pool comparisons, and risk scoring.

Token-Based Achievement System:

Earn NFTs and exclusive rewards by completing tasks tied to token usage — such as reaching certain trading volumes, holding periods, or liquidity milestones.

Partner rewards:

Token holders receive special benefits from our partners, such as reduced fees and bonuses on DeFi services, NFT markets, wallets, and launchpads.

Paid API Access:

The token acts as a key to unlock premium API endpoints offered by the platform.

Roadmap Milestones

Q2 2025

-  Support for 3 blockchain networks
-  Initial liquidity pool deployment
-  Basic swap route implementation
-  Multi-wallet connection support
-  Token page development
-  Internal testing phase

Q3

-  MVP Launch
-  DFP Token Sale
-  Waitlist launch
-  Advanced swap routing system
-  AI-Optimized Swap & Bridge Routing (Beta)

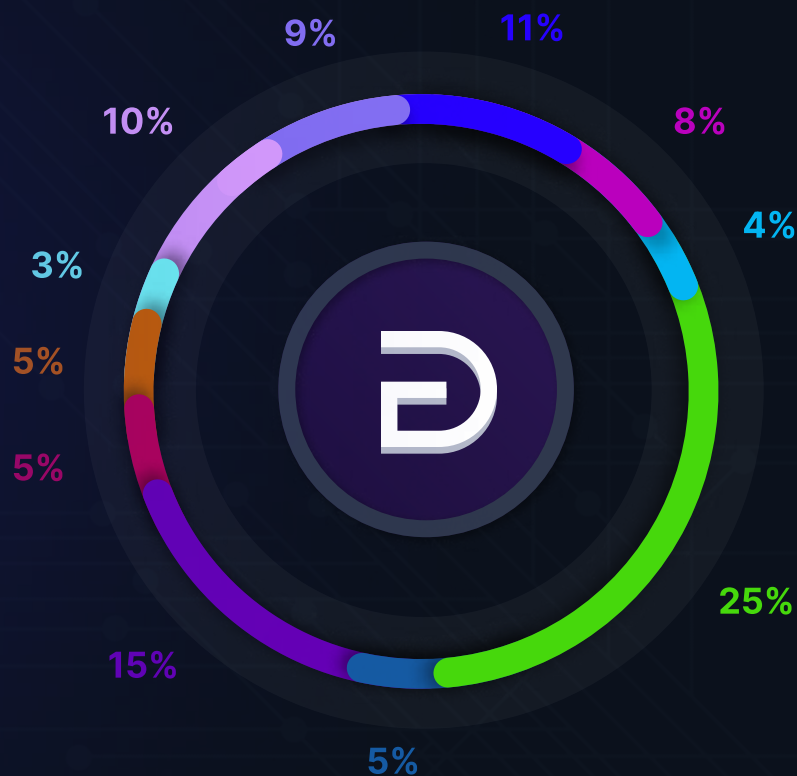

Q4

-  DFP smart contract launch
-  TGE
-  One-Click AI-Based Portfolio Management
-  DFP listings on CEXs and DEXs
-  AI-Based Liquidity Pool Discovery & Comparison
-  Fees settlement in DFP

Q1 2026

-  DFP listing on CEXs, DEXs
-  AI-powered portfolio Assistant launch
-  AI-Powered Trading Tools
-  Purchase subscriptions in DFP
-  Rewards program update

AI technologies - the future of DEXs today

One-Click AI-Based Portfolio Management

Manage your entire crypto portfolio effortlessly with AI-driven insights and automated rebalancing in just one click.

AI-Powered Trading Tools

Enhance your trading decisions with intelligent AI tools that analyze market trends, generate signals, and optimize your strategies.

AI-Optimized Swap & Bridge Routing

Get the best rates and fastest transactions by using AI to find the optimal swap and bridge routes across multiple blockchains.

AI-Based Liquidity Pool Discovery & Comparison

Discover and compare the most profitable liquidity pools with AI-powered real-time analysis and personalized recommendations.
